yetianwei.github.io | github.com/YeTianwei

Education

Wuhan University, Multi-Spectral Vision Processing Lab 2024.9 – 2026.6

M.Eng in Electronic Information, supervised by Prof. Jiayi Ma and Prof. Yong Ma

- **GPA:** 3.62/4.00
- **Selected Courses:** Optimization Theory and Methods, Stochastic Processes, Modern Circuit Layout
- **Awards:** The Second Prize Scholarship

Central South University, School of Electronic Information 2020.9 – 2024.6

B.Sc in Electronic Information Science and Technology

- **GPA:** 91.25/100, ranking top 7% out of 150
- **Selected Courses:** Algorithms and Data Structures, Signals and Systems, Digital Signal Processing
- **Awards:** Outstanding Graduates, Merit Student, The First Prize Scholarship, First Prize in Hunan Province Division of the China Undergraduate Mathematical Contest in Modeling

Publications

Multi-Shape Matching with Cycle Consistency Basis via Functional Maps

Yifan Xia*, **Tianwei Ye***, Huabing Zhou, Zhongyuan Wang, Jiayi Ma 2025

- Proc. of the AAAI Conference on Artificial Intelligence (AAAI), 2025
- Introduced a concise formulation of cycle consistency using directed graph optimization

DcMatch: Unsupervised Multi-Shape Matching with Dual-Level Consistency

Tianwei Ye, Yong Ma, Xiaoguang Mei 2025

- Proc. of the AAAI Conference on Artificial Intelligence (AAAI), 2026 (Under Review)
- Introduced a graph-based universe embedding and dual-level consistency for multi-shape matching

Locality Preservation for Unsupervised Smooth Non-Rigid Shape Matching

Tianwei Ye, Xiaoguang Mei, Yifan Xia, Fan Fan, Jun Huang, Jiayi Ma 2025

- Manuscript in preparation for submission to CVPR 2026
- Proposed a locality-preserving approach to enforce smooth correspondence

Projects

Probabilistic Joint Learning for Multimodal Image Matching

NSFC Basic Research Project for Ph.D Students, hosted by Yifan Xia 2025.1 – Present

- Design a probabilistic joint learning framework to improve generalization and accuracy in multi-modal image matching under modality gaps and limited data

UAV-Based Hyperspectral Imaging Technology for Precise Detection of Marine Pollution

Supervised by Prof. Xiaoguang Mei and Prof. Jun Huang 2024.9 – Present

- Developing a UAV-based hyperspectral imaging system for early detection and parameter inversion of typical marine pollutants in nearshore waters

Skills

Mathematics: 3D Geometry, Linear Algebra, Numerical Optimization

Programming: Python, C/C++, Matlab, $\text{\LaTeX}$

Developments: Linux, Git, CMake, Docker, Kubernetes

Deep Learning Framework: PyTorch

Language: English (*Proficient*, IELTS 7.0), Chinese (*Native*)
